LESTER LANCE J. BERMAS

Lead Software Developer

Bacoor, Cavite, Philippines | +63 916 5454 525 | bermas.lester10@gmail.com
Portfolio: lanze.vercel.app | GitHub: LanzeG | LinkedIn: lanzeg

PROFESSIONAL SUMMARY

Experienced Lead Software Developer and Full-Stack Architect with a focus on fintech and logistics automation. Expert in building resilient enterprise systems using Next.js, Docker, and Real-time infrastructure. Proven ability to architect complex platforms from the ground up, specializing in logistics optimization and banking-grade data security.

TECHNICAL SKILLS

Frontend:	Next.js (App Router), React.js, TypeScript, Tailwind CSS, Vue.js
DevOps/Cloud:	Docker, Docker Compose, Nginx, AWS (EC2/S3), Vercel, Git
Real-Time/Mobile:	WebSockets (Socket.io), iOS Development (SwiftUI), Geofencing
Backend/Data:	Node.js, PHP (Laravel), Python, PostgreSQL, MySQL, Redis

PROFESSIONAL EXPERIENCE

Lead Software Developer **January 2025 – Present**
SP Madrid & Associates

- Architecting the engineering lifecycle for **OpenCI**, a high-security automated credit investigation and fieldman management platform.
- Developed a **Dynamic Form Builder** enabling real-time adaptation to diverse banking data requirements without redeployment.
- Engineered a **Real-time Fieldman Tracking** system via GPS and WebSockets to monitor agent movement and progress instantly.
- Built a geospatial distribution engine using **Vehicle Routing Problem (VRP)** algorithms to optimize account assignments.
- Created a tamper-proof evidence system generating PDF reports with images containing hard-coded **GPS and time stamps**.
- Maintained **Route History** tracking for precise gas reimbursement and operational accountability.
- Standardized production environments with **Docker** and **Nginx** on **AWS** for maximum scalability and uptime.

Product Engineer **June 2024 – January 2025**
SP Madrid & Associates

- Designed and deployed an enterprise admin dashboard to streamline data management for major banking clients.
- Automated incentive calculation workflows for field verifiers, eliminating manual financial errors.
- Implemented bulk data processing systems that improved throughput and verification accuracy.

Intern Developer **February 2024 – May 2024**
SP Madrid & Associates

- Developed Python automation scripts that reduced 2-hour manual data workflows to 2 minutes.
- Built a geolocation standardization model to ensure address accuracy for field operations.

EDUCATION

Bachelor of Science in Information Technology (Magna Cum Laude) 2019 – 2024

Technological University of the Philippines – Manila

Senior High School Graduate (ICT Strand, With Honor) 2014 – 2019

Pasay City South High School
